ROCKLAND:

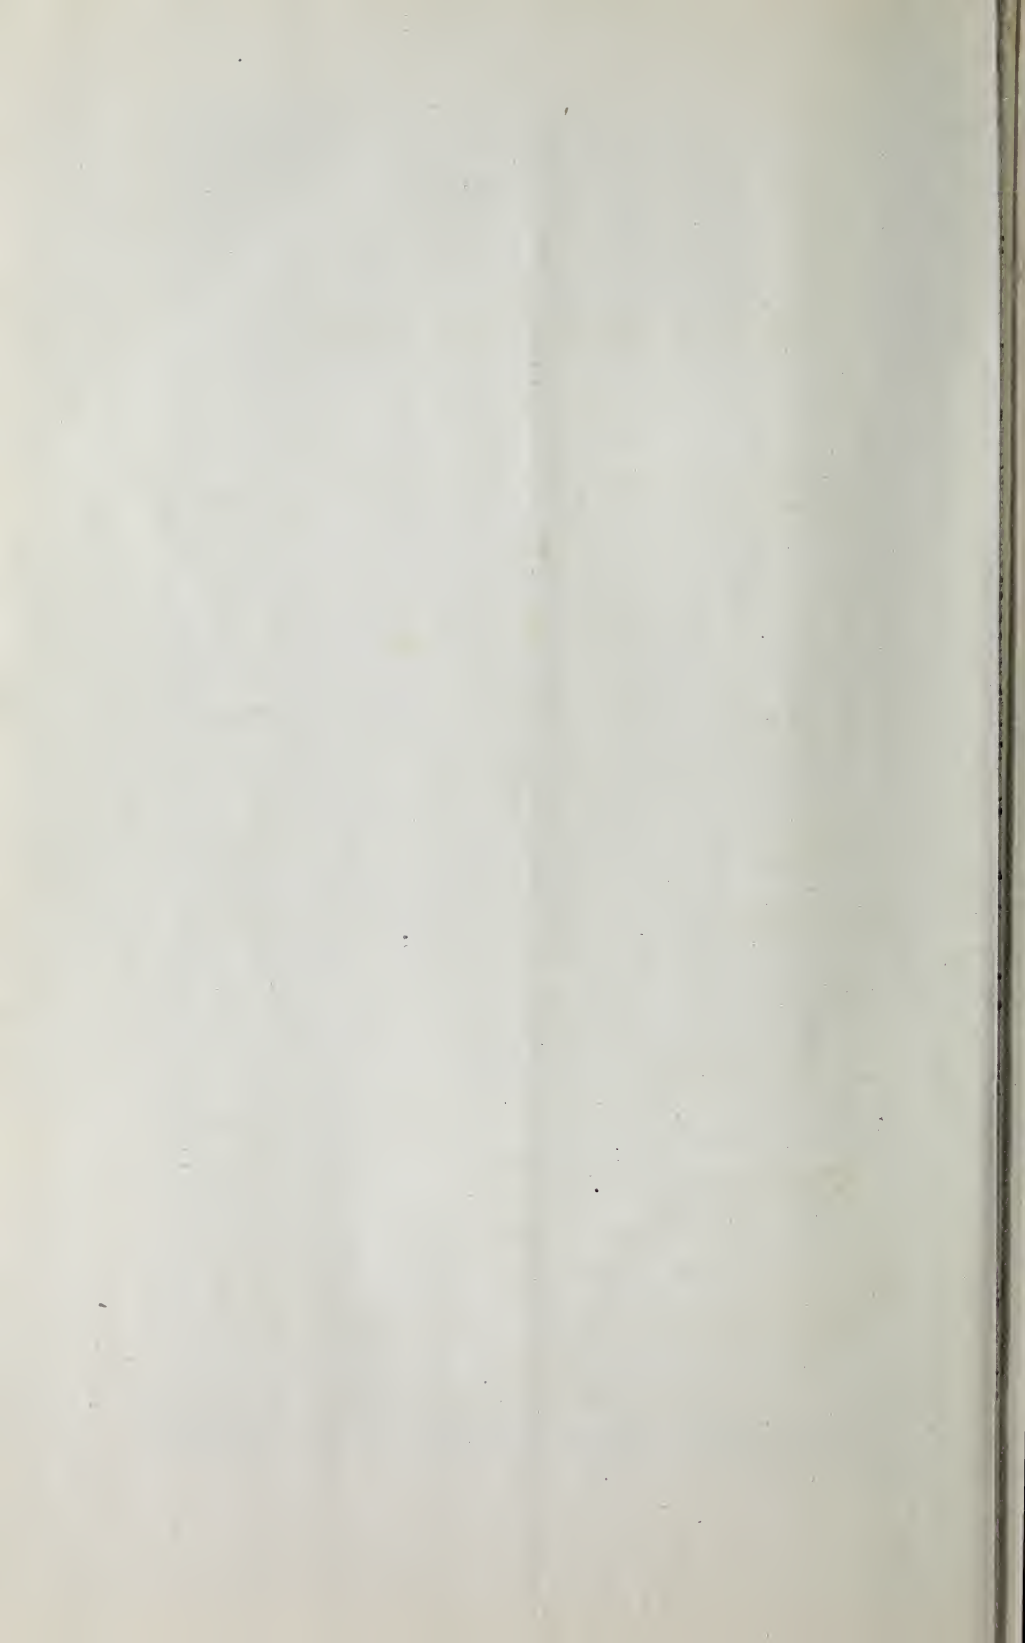

PRESS OF THE ROCKLAND OPINION

1909

TOWN OF VINALHAVEN, MAINE.

Incorporated June 25, 1789. The first town meeting was held December 15, 1789. The first Board of Selectmen were Stephen Carver, Anthony Dyer and Mark Eames for the North Island; Israel Carver, Thomas Brown and James Jewell for the South Island. This board of affairs was chosen merely to lay out roads, and it was voted that roads should be 18 feet wide. The first school teacher after incorporation was Michael Bowen, engaged to teach on the North Island for the year 1790. He received 11 pounds (about \$55) for his services. North Haven was set off in 1846, Hurricane Isle in 1878. Population in 1850, 1,252; 1860, 1,667; 1870, 1,851; 1880, 2,855; 1890, 2,617; 1900, 2,358.

Auditor's Report

Vinalhaven, Feb. 18, 1909.

The undersigned has examined the accounts of the Selectmen and Treasurer of the town of Vinalhaven for the year ending February the 18th, 1909, and find them correct and supported by vouchers, now on file at the Selectmen's office. I also certify that the cash balance in the treasury is correct, as per Treasurer's report.

Respectfully submitted,

C. E. BOMAN,
Auditor.

Report of Superintendent of Schools

To the Citizens of the Town of Vinalhaven:

I respectfully submit the following report for the year ending March, 1909:

The advancement of the schools during the past year will compare favorably with any previous year during the time I have served you as superintendent.

The work of graduates from our High school, who are attending colleges and Normal schools is generally commended, and they have proved by their standing in their various classes that they were well prepared for the work they have undertaken.

It is pleasing to know of the number of parents who have visited school during the year, as some registers show over one hundred visitors in one term. This is a duty of every parent, for it is the only means by which you can become familiar with the school system, and it will encourage teachers, and show the children you are interested in their school work.

The common school and High school accounts show some larger balances than last year, but at the time of closing the books none of the rural schools had closed, and the teachers in the High school had drawn none of their pay for the winter term.

Report of Trustees of Public Library

TO THE SELECTMEN:

Gentlemen—We herewith submit report for the year ending February 15, 1909:

RECEIPTS

Sundry bills, including postage, stationery, freight, trucking, mowing lawn, cleaning library, fee for State library, etc.,	19 78	
Printing, dedication exercises,	3 10	
Amount overdrawn last year,	114 85	
	<hr/>	\$575 16

The report shows that the library account last year was overdrawn to the amount of \$114.85, caused by the purchase of necessary furnishings for the new building.

It will be seen that the expenditures this year, including the overdrawn balance from last year, have been kept within the amount of receipts and all bills paid.

The trustees believe that the amount now appropriated by the town and State will be sufficient to pay the run-

ning expenses and steadily improve the condition of the library. Among the new books purchased this year is included a fine set of the International Encyclopedia.

The regular work of the library has been carried on except on Feb. 6, 1908, when a severe storm raged.

The adult fiction catalog has been completed and filed in the cabinet for public use. The librarian will be glad to explain it and the arrangement of books on the shelves at any time when there is not a rush at the counter. If patrons will be a little more careful not to misplace books it will be oftener possible to find the one desired.

The list of readers registered is 909; a gain of 179 during the year. Magazine subscriptions 24. Total circulation 2,282; average 15, largest 50, January 2, 1909. Total fiction circulation 10,925; average 71, largest 175, April 18, 1908. Total class circulation 813; average 5, largest 17, January 23, 1909. Fines collected, \$25.16; largest January 16, 1909, \$1.67; now due \$2.40. Total circulation, books and magazines, 14,020.

The State Travelling Library which Mr. Lyons sent us was here January 15, and July 15, 1908, 106 readers were registered; 728 books circulated. A second State Library came December 19, to be retained six months.

New books purchased 91. Old books rebound 59.

Thanks are expressed for books and magazines received from Mrs. Huntress, Mrs. Arvilla Davis, Mr. T. G. Libby, Dr. Raymond, First Church of Christ Scientist, and the W. C. T. U. Also to the young ladies and gentlemen who have so kindly assisted in keeping the books in order, repairing books and assisting in desk work.

Notice is hereby given that after March 1st, 1909, in addition to the present regular hours, the library will be open Saturday forenoon from 11 o'clock till noon.

This arrangement is made for the benefit of those living in the more remote parts of the island, so they may be able to visit the library and return home before night.

The library hours after March 1st, 1909, will be as follows, and attention is called to same;

Tuesday, Thursday, and Saturday evenings from 6 o'clock to 8, and on Saturday, from 11 o'clock to 12, and from 2 to 4 P. M. Closed on holidays.

Report of Chief Engineer of the Fire Department

TO THE SELECTMEN:

Gentlemen:—In accordance with the vote taken at the annual town meeting in the year 1905, I herewith include expenses of department with report for the municipal year just closed.

Engineer of steamer,	\$156 00
McLean Brandon Oil and Supply Co., oil and hose,	98 75
Chief Engineer, salary,	50 00
Knox Tel. and Tel. Co.,	42 00
Bodwell Granite Co., supplies,	36 09
Cost of Fire, sch. Electric Light,	32 75
G. M. Griffith, hauling engine and brush,	24 50
C. L. Boman, treasurer, two practices,	24 25
Steward, salary,	20 00
V. H. Lighting Co., gas,	15 85
D. H. Glidden, insurance engine house,	13 20
R. T. and C. St. Ry., coal for engine,	7 20
W. J. Jameson, teams and trucking,	6 70
V. & R. Steamboat Co., freight,	3 00
D. F. Mills, watching, July 4th,	3 00
Matt. Mills, watching, July 4th,	3 00
Alex Fraser, teams and trucking,	2 75
A. L. Pierce, repairs on stove,	1 50
F. M. White & Co., sponge,	60
F. H. Calderwood, repairs engine house,	47
C. B. Smith, oil,	28
S. L. Winslow, painting signs,	25
Total,	\$542 14

FOREST FIRE, SEPT. 19, 1908

Labor, men and teams,	\$576 24
-----------------------	----------

Bodwell Granite Co., mdse. and labor,	48 40
Lane Libby Fisheries Co., merchandise,	12 10
C. B. Smith & Sons, merchandise,	7 29
R. A. Jones, merchandise,	5 40
M. F. Lenfest, repairs,	1 00

Total cost of department for the year, \$1,192 75

As the appropriation was	\$750 00
and received from owners of Sch.	
Electric Light	20 00
	<hr/> \$770 00

It will thus be seen that the appropriation has been overdrawn \$422.75, but in making estimates for the year we can only count on what might be the ordinary expenses of the department and apparatus to be purchased, and so if the late disastrous fire had not occurred, the expenditure would have been considerable under the amount raised. All of the apparatus we consider in good condition, the engine has been rebuilt and is considered as good as new. During the year we have added 200 feet of hose at a cost of \$95.00. During the year, the department responded to five alarms, namely Sch. Electric Light, Robertson's Livery Stable, J. W. Carver's residence, and two forest fires, one at the Huntress place and the other at the head of Carver's Pond.

We wish to extend thanks at this time to all those who gave help at the fire which started September 18, 1908.

And in behalf of the members of the fire department we extend thanks to Mr. and Mrs. Ulmer Smith who furnished food nearly every night of the forest fire to the men on duty. We also extend thanks to Mr. Allston Huntress for his generous gift of \$25.00 to the members of the department.

We would also thank all of those who so freely helped themselves to what did not belong to them, if they would return the same to the rightful owners.

For the ensuing year we recommend an appropriation of \$750.00 This amount we believe will be sufficient to

shingle one side of the engine house and repair the reservoir near the church and pay the ordinary running expenses of the department.

Respectfully submitted,

W. J. DAVIDSON,

Chief Engineer.

Auditor's Report

Vinalhaven, February 22, 1910

I have examined the accounts of the Selectmen and Treasurer of the town of Vinalhaven for the year ending February 15, 1910, and find the same correct.

C. E. BOMAN,
Auditor.

Report of Superintendent of Schools

To the citizens of the town of Vinalhaven :

I respectfully submit the following report for the year ending March 1910.

The children have shown an interest and advancement equal to that of any previous year, and the teachers have done efficient work. The course of study was thoroughly revised during the past year with an outline of each year's work, and a copy of the same given to each pupil so that parents could know the amount of work to be accomplished.

The amount paid for teaching, fuel and janitor services is more than previous years as the committee decided to increase the length of each term one week.

The recommendation for public schools is less than last year, but this is provided for by the increase in the amount we will receive from the state.

At the close of the spring term it was found that extensive repairs were necessary to be done on No. 4 school building, and a chimney built in No. 3, primary; also a large amount of repairs needed to be done on the High school building, and this work added to the amount estimated and done on other school buildings is the cause for the overdraw in this department.

The law requires fire escapes to be built on all school buildings having a school on the second floor, and this should be taken in consideration in making the next appropriation for repairs.

The recommendation for text books, is the same as last year, and this amount is necessary as it includes all the supplies.

The work of the year has been smooth and pleasant, and the amount of money available for new books especially pleasing.

100 new books have been purchased at a cost of \$66.75 and the balance still unexpended will allow more than \$50 more for books than last year.

The juvenile title catalog has been written and the class title catalog begun. Patrons are learning the importance of keeping books in the right place, since that is the only way of finding what is desired.

The librarian has mended as many as 500 books this

year, so the number of books rebound has been but 54 and only 2 have been discarded.

The number of readers registered is 1070, but that includes some not in town now.

The total number of volumes in the library is 4136, of which 3576 are circulated and 560 kept for reference, and there are 24 magazines.

Gifts of books and magazines have come from Mr. W. E. Gross, Mrs. A. Huntress, W. C. T. U. and C. S. church. A set of prints has also been received from the publishers, showing the process of lithographing. And our friend, T. J. Lyons, who always maintains his kindly interest in us, has just sent a juvenile state library, as a gift from his son. For these helps we desire to express our sincere thanks.

The State Library returned June 12 had 100 readers. 494 books circulated, and \$0.48 fines collected.

Circulating statistics are as follows:

Total	12,878	fiction	7048	class	910	juv.	2484	mag	2436

Respectfully submitted,

A. U. PATTERSON,
H. A. DAVIDSON,
C. L. BOMAN,
Selectmen of Vinalhaven,

Auditor's Report

Vinalhaven, February 25, 1911

I have examined the accounts of the Selectmen and Treasurer of the town of Vinalhaven for the year ending February 15, 1911, and find the same correct. The cash balance is as per Treasurer's report.

C. E. BOMAN,
Auditor.

Report of Superintendent of Schools

To the inhabitants of the town of Vinalhaven:

I respectfully submit the following report of the conditions of the schools, the receipts and expenditures for the past year.

The advancement of the schools will compare favorably with any previous year, as we have had the services of competent teachers who have shown an interest to do their best for the good and advancement of their schools.

Mr. J. S. Hall, the truant officer for the village and east part of the town has reported forty-seven calls he has made during the year on children who have been absent from school without sufficient excuse, and it seems that some parents cannot fully understand the truant law; therefore I wish to quote a part of one section. Every child between the seventh and fifteenth anniversaries of his birth shall attend some public day school during the time such school is in session and an absence therefrom of one-half day or more shall be deemed a violation of this requirement.

All persons having children under their control shall cause them to attend school as provided in this section, and for every neglect of such duty shall be punished by a fine not exceeding twenty-five dollars or shall be imprisoned not exceeding thirty days.

The recommendation for schools is estimated upon running the schools thirty-three weeks during the year.

The fire escapes have not been paid for at the time of settling account and the contract for them ready for

use is \$350 which was \$100 more than estimated in the appropriation, therefore the balance on repairs will not be sufficient to pay for them by nearly fifty dollars, and as there is about \$200 to be paid for insurance the coming year, it will necessary to appropriate the amount recommended for this department.

The school committee considered it advisable to discontinue the school in No. 5, for the winter term as there was but one scholar to attend and he has attended No. 6 during the winter.

FIRE DEPARTMENT

Report of the Chief of the Fire Department for the
Year Ending February 12, 1912

To the Selectmen of Vinalhaven:

In accordance with the vote of the annual meeting of
the year 1911,

I herewith report the receipts and expenditures of the
Fire Department for the year ending February 21, 1912:

Engineer salary to March 1st, 1912,	169.00
Steward salary,	35.00

Lane & Libby Fisheries Co., supplies,	2.60
Fred Kay,	1.50

\$709.27

Amount raised by town,	750.00
Amount expended,	709.27

Amount unexpended, \$40.73

The appropriation being \$750.00 you will note there is an unexpended balance of \$40.73.

We had on hand at the close of last fiscal year 2000 feet of good hose, and have purchased during the past year 500 feet of new hose, now having on hand 2500 feet all in good condition.

During the past year we have had two small fires, one of which was a forest fire on wood lot of A. L. Picace, the other a small dwelling house at Pequoit.

We recommend for the ensuing year the sum of \$750.00 appropriation.

Respectfully submitted,

E. S. SPRAGUE,

Chief of the Fire Department.

AUDITOR'S REPORT

Vinalhaven February 28, 1912

I have examined the accounts of the Selectmen and Treasurer of the town of Vinalhaven for the year ending February 28, 1912, and find the same correct. The cash balance is as per Treasurer's report.

C. E. BOMAN,
Auditor.

Report of Superintendent of Schools

To the inhabitants of the town of Vinalhaven:

In accordance with the requirements of law I respectfully submit the following report.

It is an easy matter to look back over the work for the past year and see where some conditions could have been improved upon, but taking the year's work as a whole I believe that all who have taken an interest in the schools will agree that we have had a successful year.

The High School has steadily increased in the number enrolled during the past few years, and now every seat is filled with an enrollment of sixty, and another year there are about twenty to enter, and only six to graduate, and some provision must be made to accomodate this extra number.

I would recommend that the primary school in No. 3, be placed in the room now occupied by the Redmen, and that the grammar school be moved to the primary room, and the high school occupy the whole of the second floor of the building.

With the number of scholars to be in the school another year two teachers cannot do justice to the work, for the number of subjects taught divides the time into about thirty minutes on the average for each recitation, and it can readily be seen the amount of time given to each scholar in a class of twenty or more; therefore the appropriation should be sufficient to employ another assistant teacher.

It would be an improvement to add one week to the fall term in all the schools below the high school, as it takes

some time to review after the long vacation during the summer in order to go on with the advanced work, and the length of our school year is below the average throughout the State.

As the appropriation for text books includes supplies, material for physics and chemistry, diplomas and all other material which the law requires furnished it leaves a small amount for books, and a less amount per scholar than any town I have been able to compare with.

There will be about Two Hundred Dollars to be paid on insurance the coming year, and some of the school buildings need to be painted. The steam pipes should be thoroughly overhauled, and some of the tubes in the boiler in No. 4, should be replaced by new ones before another winter. If a school is placed in the room occupied by the Redmen it will be necessary to place a fire escape on the building, and the high school will need a few more seats; therefore the appropriation for repairs should be the full amount recommended, and if a small amount was added to this appropriation for a few years to continue the work done on school grounds the past year they would soon be in good condition.

We now have on hand 2200 feet of hose in good condition. During the past year there have been small fires, one in the pasture near the Town Farm, the other at the head of Carver's Pond.

We recommend for the ensuing year the sum of \$500.00 appropriation.

Respectfully submitted,

E. S. Sprague,

Chief of the Fire Department.

AUDITORS REPORT

Vinalhaven, February 10, 1913

I have examined the accounts of the Selectmen and Treasurer of the town of Vinalhaven for the year ending February 1, 1913, and find the same correct. the cash balance is as per Treasurer's report.

C. E. BOMAN,

Auditor,

Report of Superintendent of Schools

To the citizens of the town of Vinalhaven; I respectfully submit the following report.

The years work has been marked by no sudden or extensive change in the curriculum of studies, in the administrative methods, or in the teaching staff with the exception of the High School.

For the most part, during many years, our common schools have been under the care of experienced and successful teachers, and have not been subjected to the periodical changes in instructors from which the High School has suffered so much. The reason for this is not far to seek, as nearly all our common school teachers have homes in town, and the greater compensation which they might receive for their services elsewhere has not induced many of them to break home ties. This condition does not exist in the High School as all of these teachers have been non-residents, and as a consequence this department has served as a training school to fit teachers for other places which pay higher salaries, and we can neither compel nor expect their services when they can command higher wages elsewhere.

As long as we are unable to meet such competition we must suffer the consequence, and if it was not for the preparation that our pupils receive in the common school we would notice more the effect of these changes; however I feel that during the year covered by this report, our schools have made distinct improvements and should receive the approval of those supporting them.

As the Selectmen's report contains an itemized statement of orders drawn, it is unnecessary for me to report the expenditures other than in the aggregate.

At the last annual meeting it was voted to overdraw the appropriation for repairs, to repair the steam-pipes in No. 3 and 4 and after this was done it was found necessary to retube the boiler in No. 4 and this work and material cost \$411.08 which is the cause of the repair account being overdrawn.

The length of the school year has been increased one week in the common schools.

The usual appropriation is recommended by the Committee and the balance unexpended after the winter term closes which will be between \$400.00 and \$500.00 would be sufficient for a school year of thirty-five or thirty-six weeks.

The unexpended balance on High School after the winter term closes will be about \$200.00 and the amount recommended, with the State appropriation will secure the services of three teachers at the present salary paid.

AUDITOR'S REPORT

Vinalhaven, February 17, 1914,

I have examined the accounts of the Selectmen and Treasurer of the town of Vinalhaven for the year ending February 1, 1914, and find the same correct. The cash balance is as per Treasurer's report.

J. E. BRADSTREET,

Auditor.

Report of Superintendent of Schools

To the citizens of the town of Vinalhaven; I hereby submit the annual report.

I am well satisfied with the way our school work has been done during the past year. It was necessary to employ four new teachers at the beginning of the spring term of 1913; eight at the beginning of the fall term and five at the beginning of the winter term. It is true in most cases that teachers continued in the same school accomplish more and better work than new teachers can be expected to accomplish, yet our new teachers have proven themselves teachers of ability and are doing all that could be expected of them.

Upon vote of the School Committee our system has been changed during the year. The new arrangement began with the opening of the fall term and briefly is as follows. The old system of having a Sub-primary, Primary, Intermediate and Grammar school has been abolished and we have substituted the almost universal Nine Grade System. This simply means that the schools below the High School is now divided into nine grades, or classes, instead of twelve as formerly, which makes it

possible for the child who enters school at the age of five to enter the High School at the age of fourteen, which is I believe, the age at which they should enter upon their Secondary School work. I substituted for the Sub-primary, of three classes, grades I, II, and III; for the Primary, of three classes, grades IV and V; for the intermediate, of three classes, grades, VI and VII; for the Grammar of three classes, grades VIII and IX. It was obviously necessary to make a complete change in the course of study in changing from twelve grades to nine, and it will take at least another year before all the grades will be uniform in their work.

The remedy of an overcrowded curriculum is not to reduce the number of subjects. It is simply to reduce the mass of superfluous and unimportant requirements, and and of so adjusting, regulating and correlating the various subjects that we may reach the highest possible degree of efficiency in our teaching. The aim is to unify and simplify, rather than to multiply and magnify, the school requirements. We must determine what is useless and archaic, and in addition we must bring the requirements to the level of the child's ability. It is in order then, that we may economize time and energy for securing efficiency in our school system that the Nine Grade System has been adopted.

I wish to emphasize the absolute necessity of punctual attendance in all grades. Some mothers seem to think absence from the First and Second grades does not interfere with the work of their pupils, but a child who

is absent from either of these grades lose much that is essential. Do not allow your children to remain away from school for a day or half a day now and then, and wonder afterward why they do not do better work. All school work is so interwoven that the lesson of to-day depends on what was learned yesterday and if the pupil does not have the lesson of yesterday he will have a hard time with the lesson of to-day. In fact he must learn the lesson of yesterday before he can proceed with his work. But is it fair to expect the pupil to do two days work in one day?

Pupils have enough work assigned them for each day and no pupil can be absent and not sustain a distinct loss. Of course I realize that it is sometimes necessary for pupils to be detained from school, upon such occasions the cause should not be trivial or imaginary. The welfare of the school, the progress of each pupil, and the comfort and success of the teachers depend largely upon the unfailing attendance of every member.

The length of the school year has been lengthened to thirty-six weeks in all schools.

I believe we should have a permanent school calendar, beginning the Fall term on the second Monday in September, continuing fourteen weeks, then two weeks vacation; Winter term of twelve weeks, then two weeks vacation; Spring term of ten weeks. This will enable us to close schools early in June, which I think is desirable.

It was found necessary to reopen school No. 5 during

the fall term as there were pupils at Wharfs Quarry and vicinity to the number of thirteen who were entitled to have the privilege of attending school.

It was necessary to employ an assistant in grades I, II & III in No. 3 as there are too many little one for one teacher to have under her direction and do efficient work.

I recommend that provision be made to install permanent water in all three school buildings in No. 3 & 4 within two years. If the citizens think the expense would be too great to install water in all three buildings the same year, I recommend that water be first installed in the High School Building, for the reason that, other than for drinking purposes, running water is badly needed if the Sciences, Physics and Chemistry, are to be efficiently taught.

The High School Building was painted during the summer, the heating apparatus thoroughly repaired and the outbuildings put in good condition. This building should require only minor repairs for some time. The grade building in No. 3 should be painted the coming year and repairs made on the outbuildings to put them in as good a sanitary condition as possible.

I recommend that a hardwood floor be laid in the lower room of this building before another school year. All the other school rooms in No. 3 and 4 have hardwood floors and if one is needed anywhere, it surely is needed in this room. The present floor is badly worn and contains such wide cracks that it is almost impossible to keep it clean. In this room there are nearly sixty little ones and

we should give them a room as sanitary as it is possible to make it. Text books in good condition.

The building in No. 4 will have to be painted the coming year and the outbuildings require some repairing. Other than that the building is in good condition. Text books in this school is in good condition.

The building in No. 8 (Reach) will have to be shingled and the exterior needs painting. The interior is defaced and very unattractive and should be put in better condition. Fully 60 per cent of the text books in this school are unfit for use and will have to be replaced before another term.

No.9 (Granite Island) Interior in fair condition. Exterior will perhaps go another year without painting. The text books in this school of about thirty pupils are in a dilapidated condition. Fully 80 per cent of them will have to be replaced very soon.

No. 2 (Areys Harbor) Exterior and interior in fair condition, requiring only minor repairs the coming year. Here again the text books are in poor condition requiring many new books before another term.

No. 5 (Zion) . This building was shingled the past summer and will need but few repairs. Text books good.

No. 6. Building and text books in good condition.

No. 1 Only minor repairs needed. Text books good.

Of course there are always unforeseen repairs to be made throughout the year, but I have simply outlined the larger needs of these buildings in way of repairs and text books as I see them.

No doubt there are many things that can and will be improved upon in our schools, but those who are most interested in the education of our children are those who are working hardest to maintain the advantages we have gained and to formulate new plans and purposes for the future.

Any criticism that any citizen has to offer for the betterment of our schools will be gratefully received. No person can at a distance form a definite idea of the character of our schools, therefore I earnestly urge all who can, to visit the schools.

An enterprising and gifted teacher can bring about great improvement in schools, but it takes an interested community to keep such schools up to the standard set.

In conclusion, I wish to thank the School Committee for the service they have been to me. You cannot have good schools unless you have good teachers for upon them the immediate success of instruction depends. I therefore wish to extend my appreciation to the teachers for their faithfulness during the past year. I also wish to thank the pupils and parents for their interest and cooperation.

May we all strive to do our duty to make the schools what we wish them to be.

Respectfully submitted,

H. E. BOWMAN,
Supt. of Schools.

A gift of two books has been received from the W. C. T. U. "Life of Howe" by Mrs. Howe and "Life of Frances E. Willard"

Three books have been donated by Stephen Small.

Miss Linda A. Jones was elected librarian to succeed Laura B. Sanborn whose resignation was accepted Jan. 15, 1914.

The trustees wish to express their appreciation of the work done by Miss Sanborn during her connection with the library, in introducing the catalogue and checking system, and the strong interest she has taken in bringing the library to its present condition.

Selectmen of Vinalhaven.

AUDITOR'S REPORT

Vinalhaven, Me., Feb. 15, 1915.

Having examined the accounts of the selectmen for the year ending Feb. 1, 1915, I find satisfactory vouchers for the orders drawn on the treasurer, the total of which agrees with the total of the expenditures which they report under the various appropriations.

The amount of cash on hand as reported by the treasurer is correct.

J. E. BRADSTREET,
Auditor.

Report of Superintendent of Schools

To the Citizens of Vinalhaven; I hereby submit the report of the Schools for the past year.

An examination of the work done in our schools during the past year, together with the rules, discipline and character, will, I think, convince any fair minded person that this work goes beyond the work we did last year, both in quality and quantity.

The nine grade system is working out as well as can be expected and I am confident that by this time next year all pupils will measure up to the requirements of their particular grade.

We are endeavoring to strengthen the essentials and believe that the class entering the High School next fall will be better prepared than ever before.

You have a good corps of teachers in the grades and in the High School. The schools rank well with others in the state. Pupils in the grades are able to enter the same grade in any school in New England. The High School is in class A; next year we expect to be included in the list of High Schools from which students are admitted to most New England colleges without examination.

Registration in the grades is larger each year. There are forty more pupils in the grades than were registered last year. In the High School the gain is even more pronounced.

In 1910 there were 48 pupils in High School, 1911—57; 1912—60; 1913—64; 1914—65; 1915—76. An increase of 60 per cent in registration in two years mean much to the young people of Vinalhaven.

Consider this and draw your own conclusions as to the value of a High School education.

From classes graduating from our High School the past two years, six students are now at College, and two at Normal School. Three others from last years class will enter College this fall. Five others are now teaching, with a view of attending Normal School next year. We believe Vinalhaven is doing well in fitting the young people to compete on an equal footing with those of other towns and cities for the good things in life.

I believe in view of the fact that our High School has increased in registration that in the near future it would be advisable to introduce a commercial course.

There are a great many pupils who drop out of High School for various reasons and there are some from the grades who drop from the roll as soon as they reach the age of fifteen. I believe these pupils would remain in school if a commercial course were offered in the High School. I am of the opinion that if such a course could be offered, our registration in the High School would be increased by twenty-five pupils. I do not recommend this course now, but simply mention this matter at this time, in order that the people may have an opportunity to consider, what I believe would be a great benefit to our school system, and thereby be better prepared to

take action when the time comes.

In last year's report I tried to emphasize the necessity of punctual attendance in all grades. I wish to put further emphasis on that phase of our school life this year.

Poor attendance is the most damaging feature of the entire school system. For the children it means lessons half learned, lack of interest in the work and in the school, many parts of subjects not studied at all, and a feeling, more hurtful than all else, that "being present or absent does not matter." For the teacher it means poor and unsatisfactory progress of the classes and wholesale discouragement for the entire school. For the so-called practical authorities and citizens, it means a money waste of anywhere from fifteen to thirty per cent.

Home study is necessary. Every pupil in High School and in the upper grades has daily four lessons to prepare, some can be prepared in school during vacant periods, but not all; some should be prepared at home. The length of time to be spent on out of school study varies with different pupils and on different days. It is difficult to lay down rules to govern home study; but it may be said that unless a pupil is doing considerable systematic study at home every day, it is certain that he is not getting all his school work well done. If pupils report that they have no home study to do, parents should communicate at once with the superintendent or teacher, so that matters may be righted and failure avoided.

It is usually understood by parents that social distractions, especially on school day evenings are nearly always fatal to successful school work. It is only natural for pupils to be interested in many things outside the school room. Some of these interests can be turned to good by

the skillful teacher and the wise parent. In other cases these outside interests invade the schoolroom and demoralize the entire school. A series of events that take the pupils and teachers away from their evening studies, a succession of parties, the preparation for any entertainment that necessitates several rehearsals on school day nights will usually mar the otherwise successful work of the year. It is therefore urged upon parents that they guard with care, the time of their children against the encroachments made upon it.

In many cases the objects for which the time of the pupils is used are entirely worthy; and yet the education of the children should not be jeopardized by any project that can be carried forward in any other way. The parent should believe and should carry belief into action that for the child of school age who is well, his chiefest and most important business is to go to school. That should be made the "business" of the child as it is the "business" of the father to make the living.

The Repair Account for the past year is slightly overdrawn.

The School Building in No. 4 has been painted and put in excellent condition and should require but very little outlay for repairs for a few years to come. The building at the Reach (No. 8) has been shingled and painted and needs but few repairs on the interior for some years.

The bill of L. E. Knott & Co. \$131.77 for apparatus for Laboratory for High School was a necessity as the State Department requires us to have a certain amount of apparatus, if we are to be classed in Class A, High School.

The bill for insurance of \$187.72 and other small bills as itemized in the repair account, as well as the bill of L. E.

Knott & Co. do not come under the head of repairs, but must be charged to that account.

The text book account has a very small unexpended balance but there are some new books on hand so we have reduced the amount to be appropriated \$100.00 for the ensuing year.

In conclusion, the teachers are working hard and giving good service. They co-operate earnestly in carrying out suggestions made for the advancement of the schools.

My thanks are heartily extended to them for their excellent work during the past year. I also take this opportunity to thank the committee for their uniform kindness and courtesy.

Respectfully submitted,

H. E. BOWMAN,

Supt. of Schools.

REPORT OF SCHOOL COMMITTEE

Two years ago it became necessary to open the Zion School and add a teacher in the No. 3 Primary School,

which necessitated an extra annual expense of \$558. for teaching without considering fuel and janitor.

During the past five years the appropriation has remained at \$2,000. annually and the funds to cover the expense of these two extra teachers has drawn our Spring balance down to a point that it will be necessary to increase the appropriation to \$2500. to cover expenses for the ensuing year.

At the same time it is possible to decrease the text book appropriation from \$600. to \$500. and the repairs appropriation from \$750.00 to \$500.00 Thus the net recommendation for all school purposes is increased only \$150.00

We recommend the following appropriations for the ensuing year.

Common Schools	\$2500.00
Free High School	1300.00
Text books	500.00
Repairs	500.00

The Library is indebted to Mr. A. Huntress, for gifts of a picture and Geographical Magazine: to Miss Goodwin, a book: to Mrs. S. H. Alexander, two books and pamphlets, to Mrs. Porter Lawry, papers, to the C. S. Church, magazines, and to Mrs. Odin Roberts, thirty-one books, mostly fiction, adult and juvenile.

The unexpended balance in this department, as shown in the last three annual reports, is a sum reserved at the close of the year, for the payment of bills incurred during the first few weeks after auditing, before any allowance is received from the town, on the New Year.

The yearly appropriation by town and state is expended wholly on the Public Library.

As there has been some trouble over the collection of fines for books overdue, the Librarian has been instructed to enforce the regulations on this matter. No person owing fines for books kept over the limit of two weeks, will be allowed to take out another book until the fines are paid. In effect March first, 1915.

AUDITOR'S REPORT

Vinalhaven, Me., Feb. 12, 1916.

Having examined the accounts of the selectmen, I find them correct with satisfactory vouchers for all bills paid. The report of the treasurer as to the amount cash on hand is correct.

J. E. BRADSTREET,

Auditor.

Report of Superintendent of Schools

To the citizens of the town of Vinalhaven; I hereby submit the annual report.

Although the work of the schools has been somewhat interrupted by epidemic disease, reasonable progress has been made.

At present the schools are in a prosperous condition; the nine grade system is giving excellent results and the teaching force is working in harmony and with excellent spirit. It is realized that even with the lines of work pursued there is abundant opportunity for arduous work and constant attention if we are to reach and maintain high standards at all points.

In my last two reports, I have called the attention of parents to the necessity of constant attendance. The attendance this year has not been as good as it should be. This in a large measure, is accounted for by the great amount of sickness, but this was not the only cause for poor attendance in some cases. The teachers are deserving of commendation for their efforts to improve the attendance, but if we are to improve upon our past records it will be necessary for the parents to help.

Some of the parents have kept their children out to do errands; to work or for less creditable reasons. In order that all may know the law regarding compulsory attendance, the following Act from the State School Laws is given.

Sec. 52. If a child without sufficient excuse, shall be habitually and wilfully absent from school or shall fail without such excuse to attend school for five day sessions or for ten half-day sessions within any period of six months, he shall be deemed an habitual truant, and the superintending school committee shall notify him and any person under whose control he may be that unless he conforms to section forty-nine, the provisions of the two following sections will be enforced against them; and if thereafter such child continues irregular in attendance, the truant officers or any of them shall, when so directed by the school committee or superintendent in writing, enforce said provisions by complaint.

Sec. 53. Any person having control of a child, who is an habitual truant, as defined in the foregoing section, and being in any way responsible for such truancy, and any person who induces a child to absent himself from school, or harbors or conceals such child when he is absent, shall be punished by a fine not exceeding twenty dollars or shall be imprisoned not exceeding thirty days.

Owing to the increasing attendance in the lower grades, the town should soon provide another school room. The primary teacher in No. 4 has forty pupils, divided into three grades, and this number is sure to be

increased next year. This is too many pupils to have in a three grade room, under one teacher. In the first three grades in No. 3 there are sixty-five pupils, which is a condition that should not exist.

In the first place, sixty-five pupils is altogether too many to have in one room, in fact enough for two separate schools. And when you consider that these pupils are in the first three grades; pupils from 5 to 8 years of age; in a school where their first instruction is of vital importance, you will say with me that we should not tolerate such a state of affairs any longer than is absolutely necessary. It is impossible to change the conditions until another school room or school building is provided. If such a room could be provided I would advocate changing the grades in the following way. Put the pupils in rooms of two grades each; grades one and two; three and four; five and six; seven and eight; then unite the ninth grade from No. 3 and No. 4 into one ninth grade, thereby giving the ninth grade pupils the benefit of a full years instruction all together before entering high school. This would relieve the congestion in grades one, two and three, and furthermore would, allow the work of the ninth grade to be better correlated with that of the High School. It seemed advisable to speak of this matter at this time, so that all may have an opportunity to consider the matter, and be ready to act when some recommendation relating to it is put before you by the School Committee.

The appropriation for repairs is overdrawn owing to the fact that our repair account must meet the ex-

pense of insurance on school buildings and supplies for school-rooms. This year the above two items amounted to over three hundred dollars which left a small amount for actual repair work. Next year there will be no insurance due which will enable us to make many needed repairs for the amount recommended, \$500.00.

Last year the town appropriated \$400.00 for the purpose of providing a room for a science laboratory in the High School Building. The room is completed and ready for occupancy.

The room is 20x34 feet and will accomodate a science class of thirty students without crowding. It should meet our needs for a science laboratory for many years. Last fall Mr. Taylor, State Inspector of High Schools, visited the High School, and the State Superintendent of Schools letter to me, relative to Mr. Taylor's report, may be of interest.

Supt. H. E. Bowman,
Vinalhaven, Maine.

My dear Mr. Bowman:-

I find that Mr. Taylor has recently visited your High School for the special purpose of inquiring into the conditions under which your science is to be conducted. I am much pleased to learn that you have been able to provide a room which is apparently so well suited to your needs. I would urge that you complete the furnishing of this room and add the equipment which will be needed for the work for the year as early as possible. In this connection, I understand that you are to build additional tables and provide adeqate storage

for apparatus, also that you are to add considerable equipment to the material you now have.

Mr. Taylor had no time in his visit to go into the details of the school work exhaustively. The general tone of the school is apparently good and the limited work observed was of a satisfactory kind.

In connection with the equipment of the school, the recommendation is made that single desks be furnished and new blackboards in some of the rooms. It is further recommended that considerable additions to the library be made, including material for reference, general reading and magazine literature.

I wish to endorse these suggestions and urge that they be given attention so far as practicable in the near future.

Very truly yours,

PAYSON SMITH,

State Supt. of Public Schools.

Some sort of heating apparatus should be installed in the Primary School Building in District No. 3. We are at present using three wood stoves which is entirely unsatisfactory, both from heating standpoint and from the fact that much of the teachers time is taken up in tending the stoves which she needs for other work.

Ventilation, by this method of heating, must of necessity be poor. The children seated near the stove are entirely too hot, while those nearer the walls are too cold. Uneven temperature and bad air conditions do not contribute to cheerfulness or contentment, on the other hand, discipline, attendance, the amount and quality of work performed by teacher and pupils are much

improved where the ventilation is good and the temperature is kept uniform. The best is none too good for the boys and girls. All the desirable living conditions that would make an adult happier and healthier, are even more essential for growing children who are bound to their desks and desk work, for six of the best and brightest hours of the day.

It is with a feeling that the present harmony existing throughout the entire school department and the excellent spirit of the teaching force are in a large measure due to the wise decisions of the School Board that this report is respectfully submitted,

H. E. BOWMAN,

Supt. of Schools.
